# A Comprehensive Vision for NG9-1-1

- NG9-1-1 is an interoperable, secure, IP-based system that:
  - Employs Commonly Accepted Standards;
  - Enables the appropriate Emergency Communications Center to receive, process, and analyze all types of 9-1-1 Requests for Emergency Assistance;
  - Acquires and integrates additional information useful to handling 9-1-1 Requests for Emergency Assistance; and
  - Supports sharing information related to 9-1-1 Requests for Emergency Assistance among Emergency Communications Centers and Emergency Response Providers.

- This vision of NG9-1-1 does not exist yet anywhere in the country.

Achieving Seamless Interoperability

Public Safety's Vision for NG9-1-1

- Build on prior investments and innovations.
- Full interoperability, reliability, cybersecurity.
- Modernized definitions for:
    - Emergency Communications Center not PSAP
    - (Comprehensive) Next Generation 9-1-1
    - Seamless Interoperability
    - Commonly Accepted Standards (9-1-1 and global telecommunications)
